PROJECTS

Book Rental Angular App

- **Designed and Developed:** Created an Angular-based MEAN stack application for users to search, filter, and rent books.
- **Implemented Features:** Integrated functionalities for users to manage book rentals and for admins to handle CRUD operations efficiently.
- **Enhanced User Experience:** Utilized responsive design and user-friendly interfaces to improve the overall user experience and streamline administrative tasks.

Memories: Online Image Sharing Platform

- Created a React.js and Node.js-based platform for users to share, like, and comment on images seamlessly.
- **Optimized Performance:** Ensured smooth performance and scalability, implementing features like image uploading, tagging, and commenting with efficient backend logic.
